

# MAG FALL CONFERENCE

November 14-16, 2018

Ocean City, MD

## GOT DATA? NOW WHAT?

MAG is offering a Pre-Conference Session  
9:30-3:30 ~ Wednesday, Nov. 14

Join Carla Moore for a workout session to self-assess your system and learn the critical steps to build an integrated and aligned system that raises the floor for teaching and learning. Take the guesswork out of providing a curriculum to support implementation for all students.

Dr. Bonnie Hain and Heather Lageman will present an annotated list of district, school, and classroom-based assessments available alongside the instructional decisions that can be made based on each assessment. Time will be provided for district teams to design, develop and/or refine their systematic assessment plans using a structured protocol to work through both the data requisite for districts, schools, and classrooms, and the means to evaluate the quality of assessments designed to provide that data.
